

Maths Week 5

Monday

Aut5.7.1 - Use line graphs to solve problems on Vimeo

1 This graph shows how many miles an aeroplane has left to travel each hour on its journey from London to New York.

- How many hours is the flight?
- How many miles is the journey from London to New York?
- After 4 hours, how many more miles are left to travel?
- How long does it take to fly the final 1,000 miles?
- How many miles does the plane travel between 2 hours and 4 hours into the flight?
- Estimate how far the plane has travelled after 3 hours and 30 minutes.

2 The graph shows the rainfall in the first 8 days in October.

- How many millimetres of rain fell on the 7th October?
- It rained every day in the first 8 days in October. Is this statement correct? Explain your answer.
- The record amount of rainfall for October is 2.5 cm. Has a new record been set? Explain your answer.

3 This graph shows the conversion between miles and kilometres

- How many kilometres are there in 50 miles?
- How many miles are there in 130 km?
- Explain to a partner how you worked out the answers to part a) and b).

- Eva cycles 60 miles. Dexter cycles 80 km. Who cycles the furthest? How much further does the person cycle?
- Ron wants to convert 800 km into miles.

I can't do it because my graph doesn't go high enough.

Ron is incorrect. Explain why.

Complete the conversion.

Show your working.

800 km = miles

- A high-speed train can travel up to 400 km in an hour. How many miles can it travel in an hour?

Extension

Extension activity:

Encourage the children to collect their own data and present it as a line graph. As this objective is taken from the science curriculum, it would be a good idea to link it to investigations.

Possible investigations could be:

- Measuring shadows over time
- Melting and dissolving substances
- Plant growth

Here is a table of data.

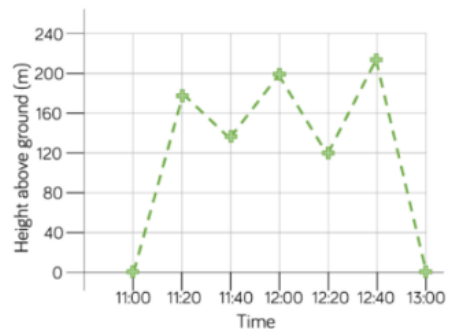

Time (min)	15	30	45	60	75
Distance (km)	25	46	67	72	98

Which intervals would be the most appropriate for the vertical axis of the line graph?

Explain your answer.

Rosie has used the data in the table to plot the line graph.

Time	11:00	11:20	11:40	12:00	12:20	12:40	13:00
Height above ground (m)	0	180	150	200	210	120	0

What mistakes has Rosie made?

Can you draw the line graph correctly?
