

# Glue in your cover page.

## Spring Term: 1<sup>st</sup> Half

### Geography

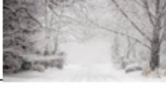

#### Programme of study:

- Name and locate countries and cities of the United Kingdom
- Describe, compare and give reasons for different weather in a region of the United Kingdom, a region in a European country, and a region within North or South America the different weathers
- Describe key physical geography, including: climate zones, biomes, rivers, mountains, volcanoes and earthquakes.
- Use maps, atlases, globes and digital/computer mapping to locate countries and describe features studied.
- Locate countries on a map and describe key physical features.
- Using a range of maps and atlases; locate a variety of countries and capitals, identify lines of longitude and latitude
- Using an Ordnance Survey map 1:50,000;
- Explain a range of OS symbols and key
- Four-figure grid references
- Begin to demonstrate an understanding of the eight points of a compass
- Compare and contrast human and physical features using terrestrial, aerial and satellite photographs
- Observe and measure
- Demonstrate an understanding of recording, presenting and interpreting data

Stick in your new knowledge organiser.

## Wild Weather

Types of weather	
Flooding	
Thunder and lightning	
Tornado	
Hurricane	
Drought	
Blizzard	

Key vocabulary	
Human geography	How human activity affects or is influenced by the Earth's surface.
Physical geography	Natural features of the Earth's surface.
Longitude	Imaginary lines that run around the Earth vertically (up and down) and meet at the North and South Poles.
Latitude	Imaginary lines that run around the Earth horizontally (across) parallel to the Equator.
Equator	An imaginary horizontal line around the middle of Earth halfway between the North Pole and the South Pole.
Capital city	A capital is a city where a region's government is located.

# Wild Weather: 6 Big Questions

What?

Where?

Who?

Why?

How?

When?

et teachers.  
weather-

Thursday 6th January

Memorable Experience

plastic cup or glass jar,  
coloring.

Fill with water. Squirt shaving  
foams. Explain that when  
you mix with water, it rains! Then  
pour on top of the cloud, and

**What you need:** Clear plastic container (size of a shoebox), red food coloring, ice cubes made with water and blue food coloring.

**What to do:** Fill the plastic container two-thirds full with lukewarm water. Let the water sit for a minute to come to air temperature. Place a blue ice cube at one of the container. Drop 3 drops of red food coloring into the water at the opposite end of the container. Watch what happens! Here's the explanation: the blue cold water (representing a cold air mass) sinks while the red warm water (representing the warm, unstable air mass) rises. This is called convection and the warm air is forced to rise by the approaching cold front, and the thunderstorm forms.

**What you need:** Frozen baking soda, cold water, squirt bottles.

**How to do:** Start by mixing two parts baking soda  
with one part water to make fluffy, moldable  
snow. Then, pour vinegar into squirt bottles  
and squirt their snowballs. The reaction  
between baking soda and vinegar will cause  
the snowballs to fizz and bubble. For a snow  
globe, pour your vinegar into a tub, then drop a

**What you need:** Two 2-liter clear plastic bottles (empty and clean), water, food coloring, glitter, duct tape.

**What you do:** Fill one of the bottles two-thirds full of water. Add food coloring and a dash of glitter. Use duct tape to fasten the two containers together. Make sure to tape tightly so that no water leaks out when you turn the bottles over. Flip the bottles so that the bottle with the water is on top. Swirl the bottle in a circular motion. This will create a vortex and a tornado will form in the

Friday 7th January

LO: To identify places in the United Kingdom and the weather there.

Temperature (°C)	Description

Take temperature of outside

Use an atlas to name and locate the countries and capital cities of the United Kingdom.

*Did you get them right?*

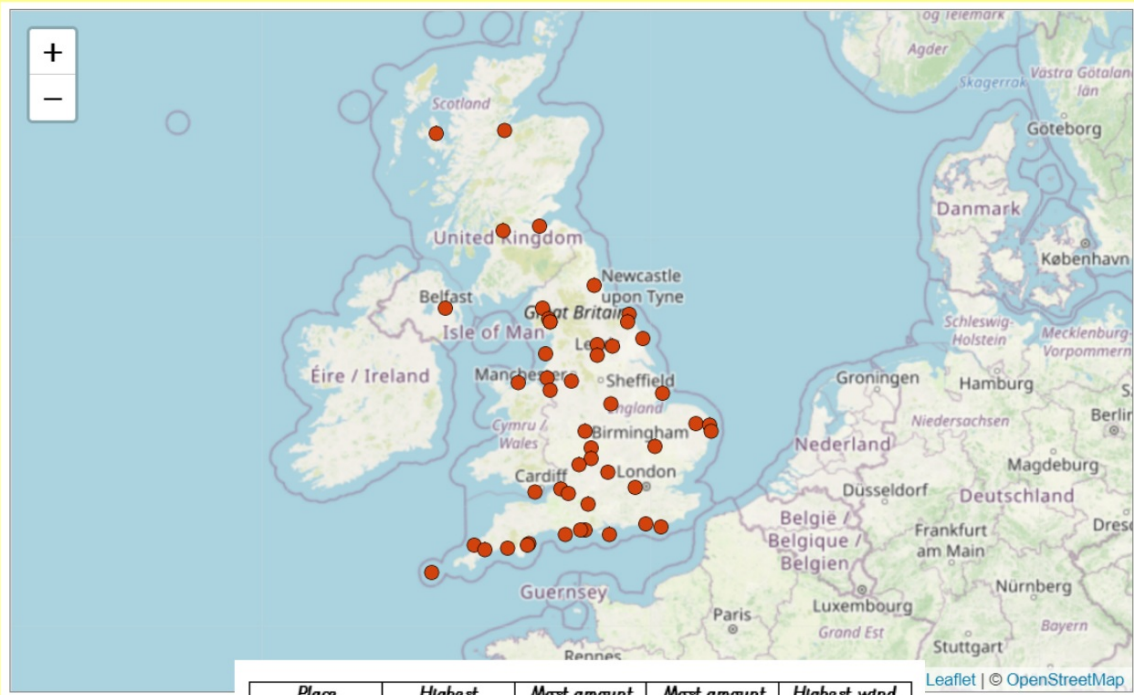

Types of weather

Identify wild weather and everyday weather

Where is most likely to get each of these weathers in the UK?

<i>Place</i>	<i>Highest temperature</i>	<i>Most amount of rain</i>	<i>Most amount of sunshine</i>	<i>Highest wind speed</i>
Edinburgh				
Cardiff				
London				
Belfast				

Why do you think the weather is different in different parts of the UK?

*In your books:*

*Summarise the weather in the United Kingdom and give a reason(s) for why it is different.*

Monday 10th January

LO: To find countries and capitals  
using maps.

Temperature (°C)	Description
10°C	grey cloudy little bit of rain

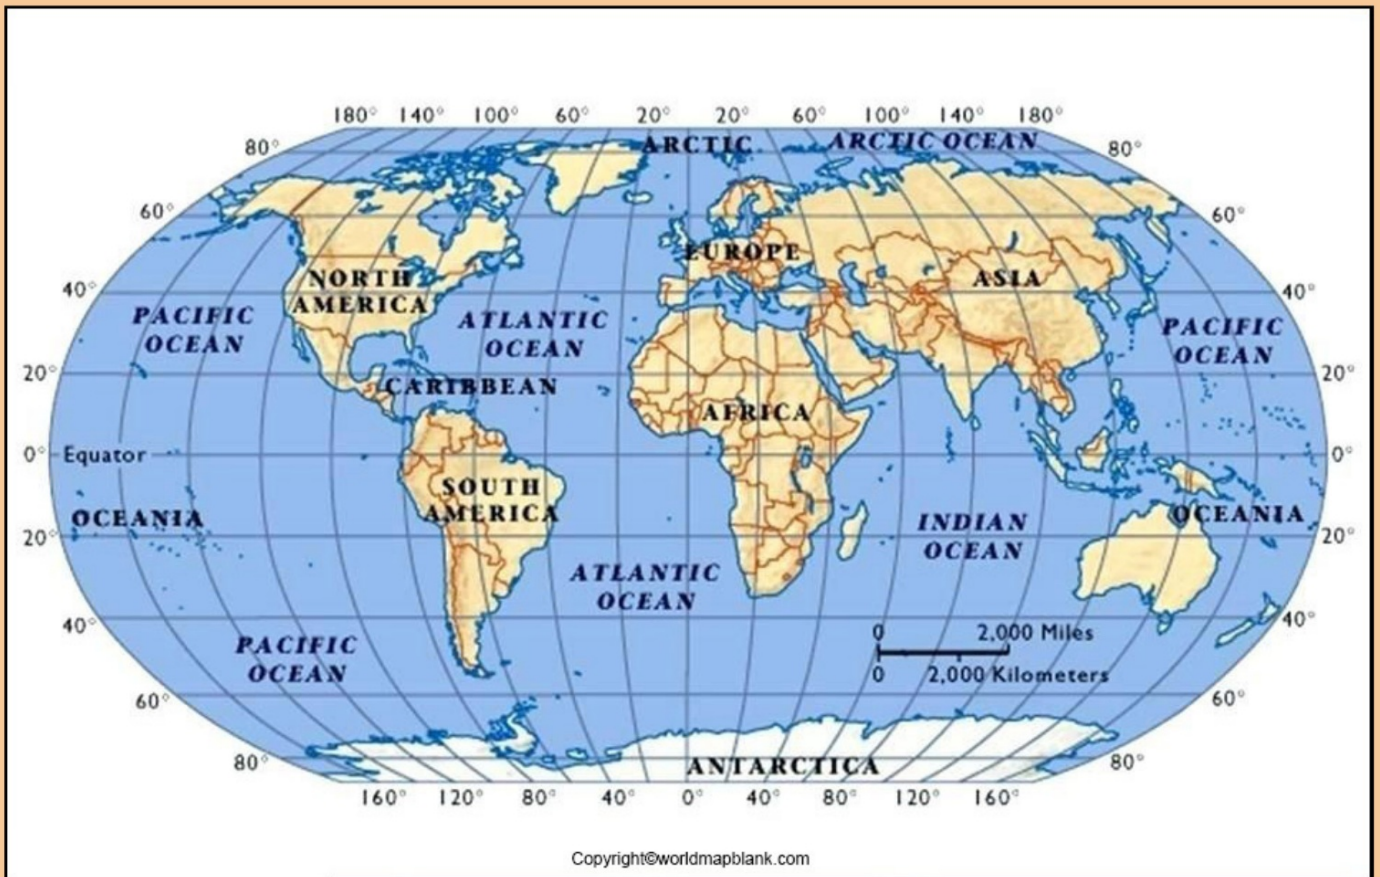

Take temperature of outside

# What is latitude and longitude?

To help locate where a place is in the world, people use imaginary lines:

To find out how far north or south a place is, lines of latitude are used. These lines run parallel to the Equator.

To find out how far east or west a place is, lines of longitude are used. These lines run from the top of the Earth to the bottom.

Copyright@worldmapblank.com

What can we see here?  
Discuss the equator and climate.

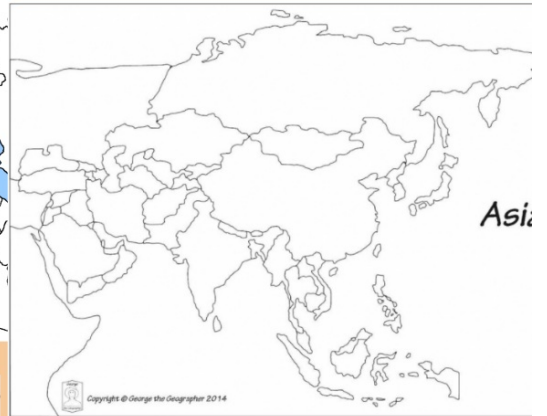

*Do we know the 7 continents?*

*In pairs, you have 5 minutes to list as many countries of the continents as you can.*

What can you see here? What can't you see here?

Colour in country - black pen name capitals with colour dot

groups, you will need to use the atlases, google maps and satellite images to locate 5 countries and their capital cities on the continent.

Colour in your country choice, in black pen and CAPITALS write the country name. Use a felt pen to draw a dot and use a black pen to write the name of the capital.

*Using your laptops as a group, find out the climate of your continent.*

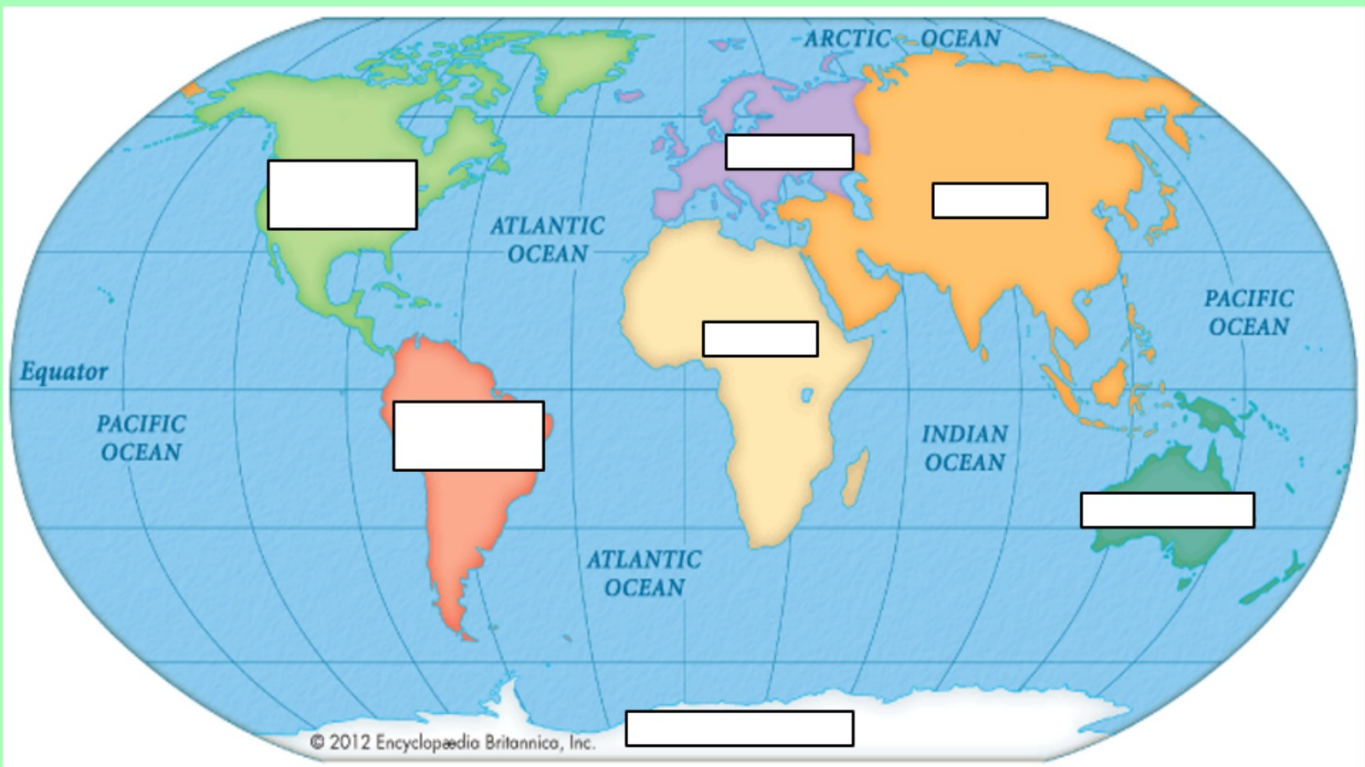

Friday 14th January

LO: To locate a country and describe the key physical features.

Temperature (°C)	Description

Take temperature of outside

Can you remember the continents of the world?

Look at these maps of China, can we spot any similarities? Do you know what they are?

*On your map, name the country and place the Mekong river and the Himalayas.*

What do you think the weather is like around these areas of physical geography?

Hint: think about the height of mountains

1-temperate zone occurs from 1900-2400 m sees short summers and long cold winters. vegetation is sparse with some high-altitude species and animals like the snow leopard.

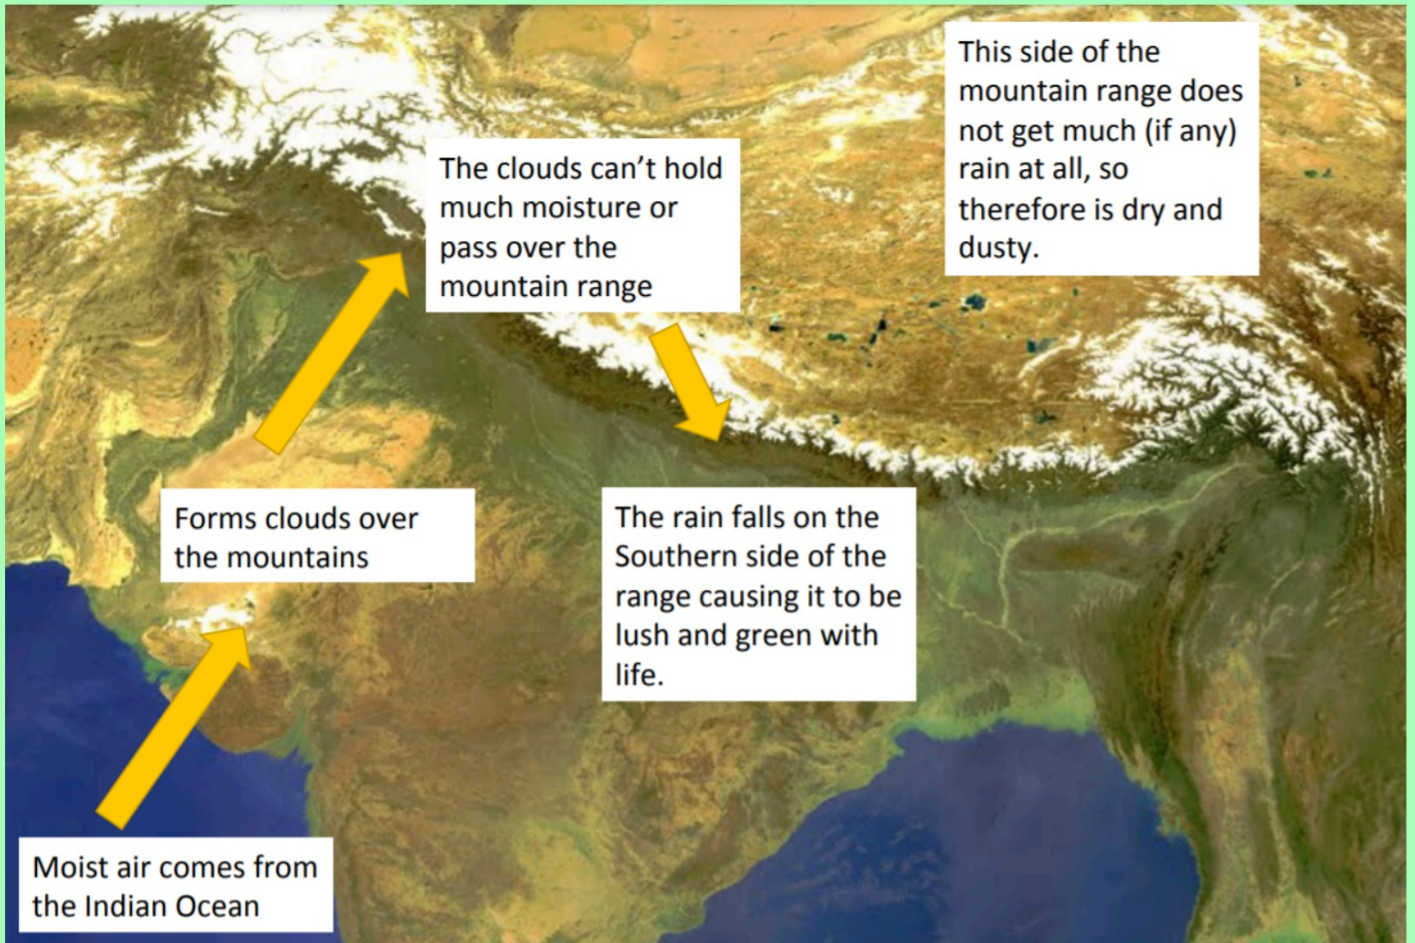

2-tropical zone is found from 450-900 m in southern foothills. Moderate winters and hot summers with moderate to high precipitation. It is heavily populated and most of the land is used for agricultural purposes.

3-alpine and glacial zones exist beyond 2000 m and all the precipitation found here is in form of snow. There vegetation found is sparse, stunted shrubs and some herb species. higher altitudes are snow-bound throughout year.

4-temperate climate falls from 900-1800 m. It is moderately inhabited. This zone is ideal for agricultural crops like potato and wheat and has moderate rainfall with warm summers.

Draw a picture of a mountain in your book, then place the correct climate in the correct area.

## Monsoon

On your map label the lush green side and the dry dusty side of the Himalayas.

★ On the lines in your book, write the title Monsoon and explain why one side is a lush green and why the other is dry and dusty.

## Mekong river

75% of the Mekong's annual flow falls with the monsoon.

This huge surge of water causes flooding. As the water races down through the river it begins to back up because there are not enough streams. This causes the level of the river to rise. The flooded river is known as the Great Lake.

When the monsoon ends, the river level drops once more, causing the Great Lake to drain.

### Monsoon

Seasonal winds that last for a few months bringing lots of rain.

Monday 17th January

LO: To describe, compare and give reasons for different weather.

Temperature (°C)	Description

Take temperature of outside

# Can you find California?

Where are they in the world?

What weather do you think they have in these regions?

What weather is shown in these photos?

Match the weather to the correct map in your book.

How are the region's weather different or the same?

Similarities

Differences

complete in books

Brainstorm as a class, write in own books.

What causes these extreme weathers?

Hint: Think back to the Mekong river  
and where they are in the world.

## Mekong river

75% of the Mekong's annual flow falls with the monsoon.

This huge surge of water causes flooding. As the water races down through the river it begins to back up because there are not enough streams. This causes the level of the river to rise.

When the monsoon ends, and the river level drops once more causing the Great Lake to drain.

### Monsoon

Seasonal winds that last for a few months bringing rain.

Friday 21st January

LO: To compare and contrast  
physical features.

Temperature (°C)	Description

Take temperature of outside

We are studying: Geography

We are learning about: Wild Weather

Last lesson we:

Located Norway and California.

Compared and contrasted Wild Weather

Gave reasons for different Wild Weather.

Today we will learn:

What physical features are.

Identify physical features of the UK and Nepal.

Compare and contrast physical features.

Link physical features to Wild Weathers.

We need to know this because:

Physical features shape the way we live on the planet.

Today we are looking at the UK and Nepal, can we locate them?

Which of these are physical features and which are human features?

factory

shop

forest

vegetation

ocean

cliff

river

hills

town

house

farm

city

mountain

beach

village

# Physical features of UK

and

t.

In your books, identify these:

Similar features

- 
- 
- 

Different features

- 
- 
- 

circle/dot

What wild weather do these places have?  
Why?  
How do the physical features contribute to these?

Discuss/write a sentence explaining.

Monday 24th January

LO: To compare and contrast  
human features.

Temperature (°C)	Description

Take temperature of outside

We are studying: Geography

We are learning about: Wild Weather

Last lesson we:

What physical features are.

Identify physical features of the UK and Nepal.

Compare and contrast physical features.

Link physical features to Wild Weathers.

Today we will learn:

What human features are.

Identify human features of the UK and Nepal.

Compare and contrast human features.

Link human features to Wild Weathers.

We need to know this because:

Human features are the way we work on the planet.

Can you remember where on the map the UK and Nepal are?

Which of these are physical features and which are human features?

factory

shop

vegetation

ocean

cliff

re title Human features of Nepal

l  
of  
uman  
and  
t.

In your books, identify these:

Similar features

- 
- 
- 

Annotate your drawings to show what makes them different.

Why are they different?

What wild weather do these places have?  
Why?  
How do the human features contribute to these?

Discuss/write a sentence explaining.

Friday 28th January

LO: To identify and use  
symbols and grid references.

Temperature (°C)	Description

Take temperature of outside

We are studying: Geography

We are learning about: Wild Weather

Last lesson we:

What human features are.

Identify human features of the UK and Nepal.

Compare and contrast human features.

Link human features to Wild Weathers.

Today we will learn:

Symbols on an Ordnance survey map.

4 figure grid references.

We need to know this because:

Maps are a way of navigating.

What do you think these are?  
Where might you see them?

Sch

What do you think these are now?

What can you see on this map?

What is at grid reference:

1. 6409
2. 6604
3. 6908
4. 6104
5. 6807
6. 7209
7. 6704
8. 6208
9. 6509
10. 7205

*Glue the grid references into your book and identify as many things as you can in that box.*

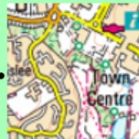

What is at grid reference:

1. 6409
2. 6604
3. 6908
4. 6104
5. 6807
6. 7209
7. 6704
8. 6208
9. 6509
10. 7205

Use a coloured pencil to mark your answers!

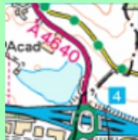

1.  Parking  
Nature reserve  
Golf course  
Footpath

2.  Information centre  
Picnic site  
Road

3.  Information centre  
Bus station

4.  River  
Telephone  
Embankment

5.  School  
Road

6.  Pool  
Motorway

7.  Church with tower  
Youth hostel

8.  Viewpoint or summit  
Trees

9.  Nature reserve  
Woods

10.  Main road

*It is your turn to make your own map!*

*You need to include items from the Ordnance Survey map, grid references and colour.*

Monday 31st January

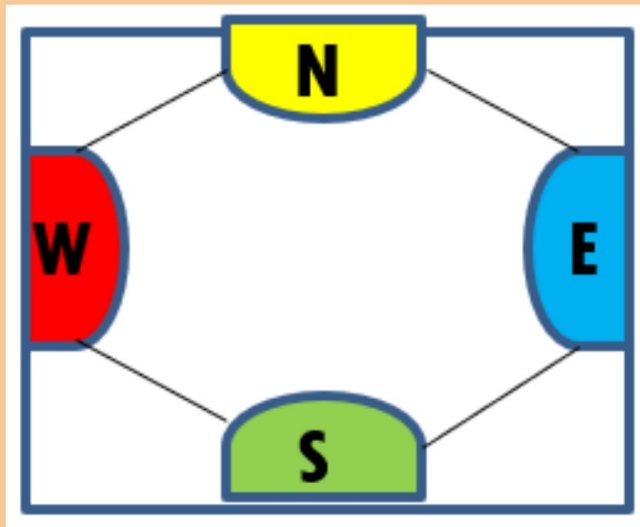

LO: To understand the eight points  
of a compass.

Temperature (°C)	Description

Take temperature of outside

*What is this?*

*Play around the room,  
progress to 8 points*

*What is this? How do we use it?*

Your task today:

Starting from your classroom, you need to write directions of how to get to these places in order.

- The pond
- The play apparatus
- The Astro
- A slope
- Trees-walk
- Back to the classroom

You need to write down, how many steps and in which direction.

# Wrockwardine Wood C of E Junior School

Scale 1:1250  
0 metres 100  
1cm represents 12.5 m

Magnetic North

- slope
- knoll
- depression
- high wall
- tree, bush
- tree stump, pond
- low fence
- fence
- high fence
- path
- play apparatus
- seat, post
- hedge, gate
- building
- canopy
- paved area, steps
- wood chippings
- garden
- vegetation boundary
- open land
- rough open land
- trees - runnable
- trees - walk
- thick trees, bushes
- seasonal undergrowth

We need to add in how many steps in that direction!

1) Classroom to pond

..... steps in a ..... direction

2) Pond to play apparatus

..... steps in a ..... direction

Now let's go outside to add in  
our steps and check our  
directions work.

Friday 4th February

LO:

Demonstrate an understanding of recording and presenting and interpreting data

Temperature	Description

Take temperature of outside

Wednesday 9th February

Innovate: Make a town

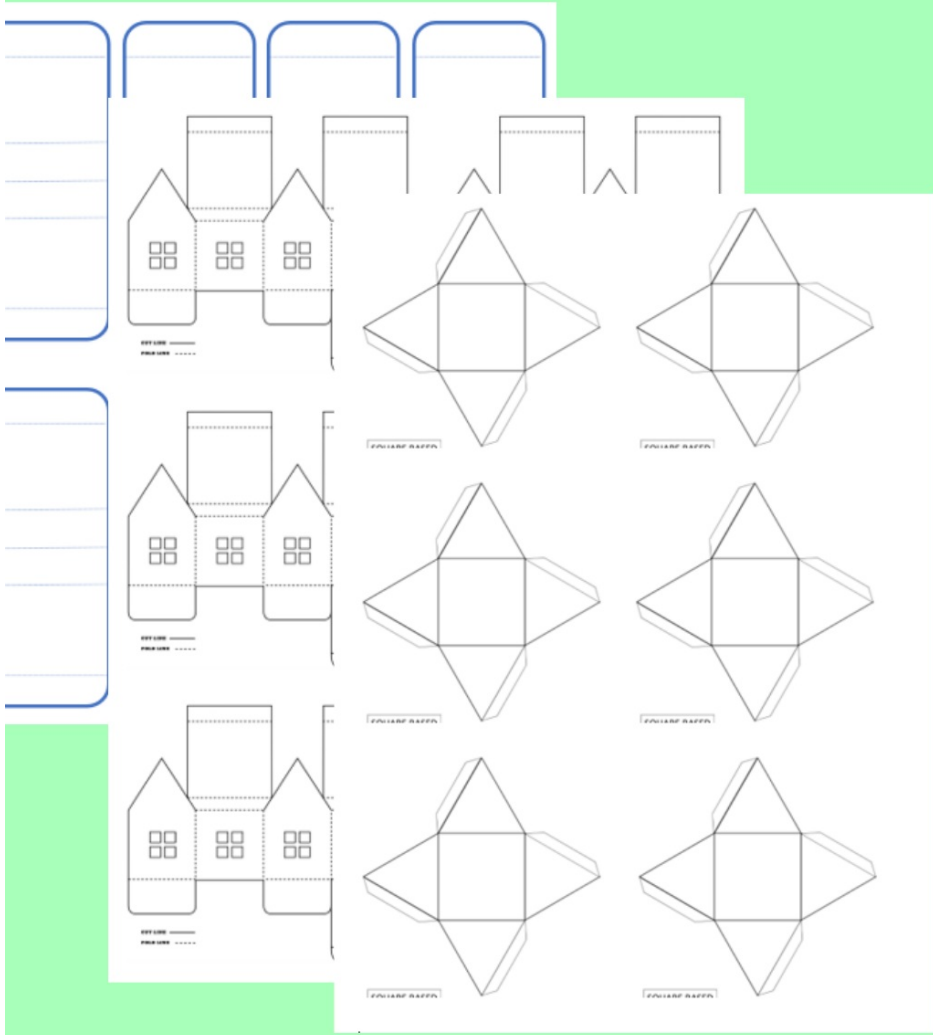

Temperature (°C)	Description

Take temperature of outside

Your task is to make a town with physical and human features.

You must also explain why you have chosen to place each part where you have in relation to wild weather.

Use these templates to make your buildings and mountains.

You can use colour and name each building so I know what it is!
